Project No. 2022-028

Mr. Robert Rosa
Hoyt Land Surveying
1287 Washington Street
Weymouth, MA 02189

**Re: Completed Seawall Revetment Remediation Work at 93 Kimball Beach
Road, Hingham, MA**

Mr. Rosa:

This is written to certify that the seawall remedial work undertaken, consisting primarily of the removal and resetting of the stone revetment, was executed in a workmanlike manner that resulted in removal of all revetment stone beyond the MHW line, removal of unsuitable revetment material, reduction of the overall slope, and adjustment to the top of revetment elevation relative to the concrete wall cap.

The remedial work on the revetment stone installation has been completed as described and proposed in the Hoyt Remediation Plan dated July 29, 2026 and the ConComm Enforcement Order dated July 30, 2026. In my professional opinion, the project is presently in substantial compliance with the Amended Order of Conditions for the project, with the final conditions from an on the ground survey depicted on the Revetment Remediation As-Built Plan, prepared by Hoyt, dated August 24, 2026.

If you have any questions regarding this report, or if you require additional information, please do not hesitate to call.

Very Truly Yours,

Robert M. Desrosiers, P.E., M. ASCE
